The Journal of Current Laser Abstracts is a monthly reference journal devoted to the comprehensive coverage of the world's open literature on laser theory, design and application. More than one thousand source publications are continually reviewed and include periodicals, journals, patent gazettes, transaction proceedings, government and company publications, and books. Subject classifications include all aspects of lasers and laser technology and diverse applications such as laser fusion, laser isotope separation, guidance, holography, display, geodesy, and medicine. To make pertinent references easier to find, an indexing system of over one hundred topics enables the subscriber to retrieve information in a fraction of the time required by a manual search.

The JOURNAL OF CURRENT LASER ABSTRACTS is published monthly by the Institute for Laser Documentation, P.O. Box 2070, Rolling Hills, California 90274. The Annual Subscription rate is \$225, with air mail delivery outside the U.S. available at \$20 and first class mail delivery available to domestic subscribers at \$15.

stay out in front!

In this age of sudden technological advances, the borders of many subjects are breached and invaded by other subject areas, resulting in a mingling of disciplines such as lasers and biomedicine, imaging systems and computers, holography and metrology, etc. It is therefore important that you have a system available that continually reorganizes and integrates laser information as the knowledge grows — a system that enables you to find even the most peripheral information of value to you — and lets you find it in seconds via the clear and succinct Subject Classification Code, Author Index, Corporate Author Index, and New Patent Index.

The Journal of Current Laser Abstracts is just such a system.

Encourage your fellow workers to use the Journal with its fast and easy method for locating a paper or patent — its like having your own personal assistant.

Ask about our special multiple-subscription discount rate.
